Aeris Caribbean Operation Established

As part of Aeris Environmental's North American expansion Aeris Atlantic LLC (Aeris' subsidiary on the east coast of USA) has established new operations in Puerto Rico under the trading name Aeris Caribbean.

Puerto Rico offers a major opportunity to Aeris due to the combination of a relatively hot and humid environment, a high concentration of global corporations with manufacturing plants in the region (including Intel, Hewlett Packard, GlaxoSmithKline, Lilly, Johnson and Johnson and Merck & Co.) and a very high cost of energy.

The unique AerisGuard HVAC Performance Solution offers customers reduced energy consumption, healthier air and enhanced indoor comfort levels resulting from significant improvements in the efficiency of their air-conditioning systems.

At the beginning of 2008 Aeris successfully implemented the AerisGuard technology at two facilities in Puerto Rico owned by Merck & Co, Inc. as part of Aeris' global supply agreement (based on energy saving) with the organization. Aeris Caribbean is now working on building on these strong reference sites.

We are also pleased to advise that Mr. William Sanchez has joined the Aeris team to manage the Puerto Rico operations. William has a mechanical engineering background, has an MBA from Bayamon Central University and has worked for a number of international corporations including Honeywell and Atlas-Copco. He will be based near San Juan in Puerto Rico.

The Aeris Caribbean team is looking forward to strong revenue growth over the next 12-18 months based on its association with Merck and Mr. Sanchez's strong relationships in the region.

Huw Jones
Chief Executive Officer

About Aeris Environmental

Aeris Environmental Ltd is an environmental services company focusing on the international environmental hygiene and system performance market. The Company has two core patented technologies centered on multi-enzyme biofilm removal solutions and residual anti-microbial coatings. Aeris has developed products for application in the air-conditioning and refrigeration service and manufacturing industries together with the large water treatment market.

The AerisGuard Performance Solutions clean and protect air-conditioning and refrigeration systems from commonly occurring bacterial and mould contamination problems. Systems protected by AerisGuard provide significant equipment efficiency, energy reduction, human health and asset management benefits.
