Australian Securities Exchange

### APPOINTMENT OF DR DAVID FISHER

The Board of Aeris Environmental Ltd (ASX: AEI) is pleased to announce the appointment of Dr David Fisher as Managing Director, effective 9 May 2011. David will be leading the Company in his executive capacity whilst still attending to some current obligations.

David has some 30 years experience in life sciences companies in senior management roles and has, for the past 10 years, been an active investor in the sector through Brandon Capital Partners, of which he was a founding partner. Before this, David was General Manager of Peptech Limited from inception in 1985 to 1995 (became Arana Therapeutics and acquired by Cephalon, Inc). During this period, Peptech went from a start-up to having R&D operations in Australia, the UK, the US and manufacturing operations in Denmark. Prior to 1985 he spent 10 years with Pharmacia AB (now part of Pfizer, Inc), including five years at their head office in Sweden.

David is a director of Nanosonics Limited, Signostics Ltd and Global Kinetics Corporation Pty Ltd. He is a past president of the Australian Biotechnology Association and past chairman of the CSIRO's Division of Animal Production Industry Advisory Committee. David has a first class honours degree in Rural Science, a PhD in Chemical Engineering from the University of Sydney, and a Masters degree in Applied Finance and Investments from the Financial Services Institute of Australasia (Finsia). He is a Fellow of Finsia and a member of AusBiotech.

Aeris is at a pivotal point in its development. With key prospective partners and customers negotiating alliances with Aeris' "Antimicrobial Smart-Surfaces Technologies," one of David's key responsibilities will be to oversee the successful commercialisation conclusion and implementation of these relationships.

Aeris welcomes Dr David Fisher as a highly-experienced board member and leader. The Board has confidence that under his guidance, the Company will move with great focus in translating its proprietary platform technologies and products into substantial commercial outcomes.
